

MAXIMUM MOBILITY (M²)

STRUCTURAL FIREFIGHTING GEAR

Ricochet designs and manufactures premium structural turnout gear that prioritizes protection, mobility, and long-term value. Built in Philadelphia with firefighter input and NFPA-certified materials, our gear combines superior quality, customized performance, and exceptional customer experience. From certified non-PFAS solutions to responsive lead times and unmatched service, we support departments' evolving health, safety, and compliance needs. When performance matters most, Ricochet delivers gear you can trust—because lives depend on it.

 PROUDLY MADE IN PHILADELPHIA, PA

SOLE SUPPLIER OF TURNOUT GEAR FOR THE U.S. AIRFORCE

M² MAXIMUM MOBILITY DESIGN

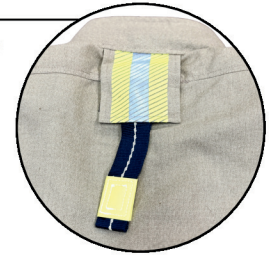

Every set of Ricochet turnout gear is built around our signature Maximum Mobility™ (M²) design—engineered to move with you through every climb, crawl, and call. This isn't a premium add-on; it's standard in every configuration we build. M² integrates ergonomic patterning and strategic paneling that mirror the way firefighters actually work, reducing bulk, restriction, and fatigue while helping you stay cooler, faster, and more effective on scene. It's gear built to perform under pressure—because when every second counts, comfort and mobility aren't extras, they're essential.

	<p>CLOSURES</p> <p>Featuring a moisture-barrier storm flap, high-temp polymer zipper with alternative closure options, and flame-resistant hook-and-loop — delivering uncompromising thermal and moisture defense in any condition.</p>		<p>COLLAR</p> <p>Contoured collar with storm flap extension eliminates bulky throat straps, providing full element protection while folding down easily when not needed.</p>
<p>THERMAL AIR CHANNELS</p> <p>Shoulder and back air channels provide advanced airflow for peak thermal performance and lasting comfort</p>		<p>BI-SWING BACK</p> <p>Provides extra articulation to maintain full mobility during critical operations—without sacrificing thermal protection. Less restriction means reduced fatigue and faster response.</p>	
	<p>UNDERARM PANELS</p> <p>Built for action. These panels run from cuff to hem, eliminating underarm seams and delivering Maximum Mobility™. That means no coat rise, no cuff creep—just unrestricted movement when it matters most.</p>		<p>LOAD BALANCED WAIST</p> <p>Transfers weight to your hips for reduced shoulder fatigue and increased mobility—so you stay agile, balanced, and mission-ready.</p>
<p>BI-SWING KNEE</p> <p>Anatomically patterned for unrestricted movement and reinforced with Ara-shield™ and foam padding—delivering durability, impact protection, and Maximum Mobility™ when you're on your knees, climbing, or crawling.</p>		<p>INTEGRATED WAISTBAND</p> <p>Flat, adjustable design delivers a secure, personalized fit that won't interfere with gear—keeping you comfortable, mobile, and focused on the job.</p>	
	<p>LEG PANEL</p> <p>Eliminates binding and pant-rise at the boot for unrestricted movement, enhanced comfort, and full coverage when climbing, crawling, or squatting.</p>		<p>REINFORCED, ANGLED BOOT CUT</p> <p>45° angled design resists wear at corners, with reinforced hems and optional Ara-shield™ for long-lasting protection and a clean, comfortable fit over boots</p>

MAXIMUM MOBILITY™:
BUILT FOR THE PUSH, THE
SEARCH, AND THE SAVE.

You don't slow down—and your gear shouldn't either. Ricochet's Maximum Mobility™ design moves with your body, not against it—reducing fatigue and keeping you focused when it matters most.

Choose from battle-tested packages or customize your own with endless options, including non-PFAS composites, women's-specific fits, and sizing that feels right the first time. Each configuration delivers the performance, comfort, and protection you expect from a company built around firefighter feedback.

And we don't stop at structural gear. From Wildland and EMS apparel to USAR and Technical Rescue solutions, Ricochet equips you for every mission—because your job demands more than one type of protection.

Supported by a nationwide dealer network and a team of reps who've worn the gear and lived the job, Ricochet brings firsthand experience and genuine commitment to every department we serve.

Proudly made in Philadelphia, PA, and trusted as the sole turnout gear provider for the U.S. Air Force.
