

GORE-TEX CROSSTECH® INNOVATE MOISTURE BARRIER

RELIABLE NFPA-PERFORMANCE THROUGH UNPARALLELED ENGINEERING

- ◆ Reliable protection against blood, body fluids, NFPA common chemicals, and water
- ◆ Advanced engineering ensures optimized performance of an integrated product package, including our moisture barrier fabric, seam tape, and repair tape
- ◆ Complies with the optional requirement of NFPA 1970(71) standard

With our core principles at the forefront, we unleash the innate potential that Bill and Vieve Gore saw in all individuals. As a result of doing this well, we open new possibilities—paving the way for innovative, novel materials. Before we introduce anything into the market, our GORE-TEX CROSSTECH® products have to meet high standards—our own. Standards that deliver unparalleled engineering for first responders. It's what you've come to expect from us.

RELIABLE PROTECTION

This unique, innovative barrier has been made by Gore to provide reliable penetration resistance against blood, body fluids, NFPA common chemicals, and water. Testing showed the barrier, and its seams remained liquid penetration resistant after 25 wash/dry cycles and five convective heat exposures—2 ½ times greater than what the standard requires.

UNPARALLELED ENGINEERING

Taking a full-system approach—fabric, seam tape, repair tape—ensures each part of the integrated package contributes to the overall product performance. We leverage our material science and innovation expertise to find solutions for real, and often complex problems. Results that are not only achieved through proprietary films, textiles, and adhesives, but also our legacy of know-how behind our high-performance fabrics.

OPTIONAL NFPA REQUIREMENT

The GORE-TEX CROSSTECH® Innovate Moisture Barrier upon certification had a PFAS (total fluorine) concentration of no more than 100 PPM. It's a novel material manufactured without intentionally added per- and polyfluorinated substances that provides departments with a reliable choice to align with the optional requirement of the NFPA 1970(71) standard.

BUILDING UPON OUR HERITAGE

From technologies that enhance the safety and performance of firefighters to those that improve patient outcomes, or explore the origins of the universe, Gore products make meaningful differences. As we look to the future, we will build on our heritage and renew our aspiration as a purpose-driven Enterprise that delivers on our promise of Together, improving life.

SOLUTIONS FOR REAL AND OFTEN COMPLEX PROBLEMS.

Warning: No products, including garments and accessories, protect completely, even when new; their protective performance will decline with wear, tear, abrasion, and other damage associated with use.

*Made without intentionally added per- and polyfluorinated substances; may contain trace amounts

- BLOOD-BORNE AND VIRAL PATHOGEN PROTECTION
- PENETRATION RESISTANT TO NFPA COMMON CHEMICALS
- BREATHABLE
- DURABLE
- THERMALLY STABLE
- WATERPROOF
- PFAS-FREE* LAMINATE

MADE WITH

GORE-TEX CROSSTECH®
INNOVATE MOISTURE BARRIER

* made without intentionally added per- and polyfluorinated substances; may contain trace amounts.

Gore provides our manufacturers with a proprietary moisture barrier package that enables an overall system approach to product performance – fabric, seam tape, and repair tape.
