

GORE-TEX CROSSTECH® PRIME MOISTURE BARRIER

EXCELLENT BREATHABILITY TO HELP
MANAGE HEAT STRESS BETTER

- ◆ Manage effects of rising body core temperatures with excellent breathability
- ◆ Elevate your confidence knowing it's component recognized to the NFPA 1970 (71) standard and compliant with EN 469
- ◆ Long-lasting protection against blood, body fluids, NFPA common chemicals, and water

Research has shown that small increases in body core temperatures can have a significant impact on firefighter vigilance in the areas of hearing loss, exhaustion, motor control, and mental accuracy.

UNMATCHED BREATHABILITY

In a broad range of response scenarios, the heat generated by your body needs to effectively escape through your PPE. This is increasingly significant as firefighters learn the importance of staying fully zipped up with mask on to avoid harmful exposures at the scene. The highly breathable GORE-TEX CROSSTECH® Prime Moisture Barrier enables perspiration to escape more freely to help manage your body core temperature better.

HIGH THERMAL STABILITY

Firefighters can encounter extreme conditions that involve elevated temperatures. When tested in accordance with the NFPA 1970 (71) standard, this moisture barrier remained thermally stable and did not melt, stick, or ignite.

GLOBAL CERTIFICATION

The moisture barrier in your gear is subjected to more tests than the outer shell and thermal liner combined. Increased confidence can be gained knowing this barrier has been put through the paces, allowing it to achieve component recognition to the NFPA 1970 (71) standard and compliance with EN 469.

BUILDING UPON OUR HERITAGE

From technologies that enhance the safety and performance of firefighters to those that improve patient outcomes, or explore the origins of the universe, Gore products make meaningful differences. As we look to the future, we will build on our heritage and renew our aspiration as a purpose-driven Enterprise that delivers on our promise of Together, improving life.

SOLUTIONS FOR REAL AND OFTEN COMPLEX PROBLEMS.
